Cairo, October 5, 2026: Taaleem Management Services ("Taaleem") is proud to announce a record enrollment year for AY 2026/27. New enrollment reached 6,047 students* across its three operating universities, up 13% year-on-year (YoY), with intake quota utilization of 82%. Total student body grew 22% YoY to a record 19,037 students, and capacity utilization improved to 56%, reflecting continued demand and an expanding academic offering, with significant room for further growth. Operating faculties increased from 17 to 20. Management expects the record intake to contribute significantly to EBITDA growth relative to Taaleem's historical average.

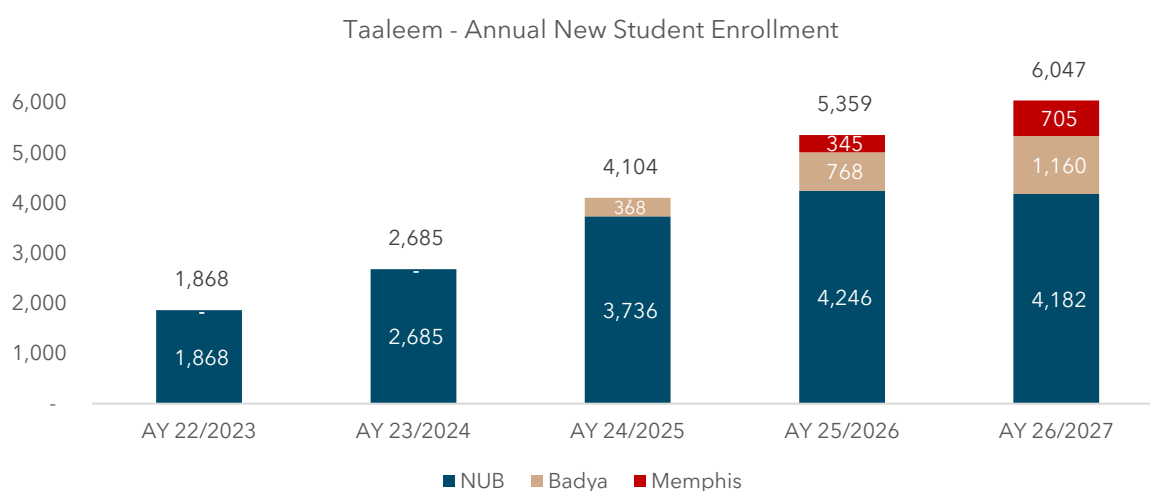

Medical education remains at the core of Taaleem's portfolio, with medical students accounting for 60% of the total student body. By university, medical students represent 56% of NUB's student body, 78% of Badya's and 85% of Memphis's. Across Taaleem's faculties of Medicine and Computer Science student base grew 27% YoY and 25% YoY respectively, reflecting strong demand for healthcare and technology disciplines and Taaleem's ability to expand into high-growth fields.

Badya University, in its third year of operations, grew its new annual intake by 51% YoY and total student body by 98% YoY, driven by medical students which are up 78% YoY. Healthcare education remains a key pillar of its academic profile, supported by its affiliation with the University of Texas Medical Branch.

In AY 2026/27, Badya also launched its Faculty of Engineering, diversifying its offering beyond medical education.

Memphis University's total student body grew 204% YoY, driven by the new Faculties of Engineering and Business Administration and continued expansion in medicine, where the student base rose 157% YoY, reflecting strong momentum across both established and newly introduced academic disciplines.

Taaleem remains committed to expanding access to high-quality education and meeting Egypt's growing demand for future-ready medical, technology, engineering and business professionals, through the continued expansion and diversification of its universities and programs.

Established in 2015, Taaleem is Egypt's leading university operator. The company runs a replicable, platform-based model that centralizes support functions to create synergies and economies of scale—freeing academic units to focus on delivering accessible, high-quality education and a rich student experience. This model proved its value with Taaleem's first asset, Nahda University in Beni Suef (NUB)—the largest and first private university in Upper Egypt—expanding access to quality, skills-based learning in a populous, underserved region. In partnership with Palm Hills Developments, Taaleem established Badya University in West Cairo as its second asset, while the latest addition Memphis University in East Cairo marks its third, broadening both geographic reach and program offerings. Taaleem continues to pursue disciplined growth—through both M&A and greenfield projects—to build on its strong track record of success.
